PIJS

2022

This headset comes with High-Definition sound and on-ear controls. Laser-tuned drivers and built-in equalizer provide rich, digital audio for full immersion in music, games and calls. This plug-and-play headset can be used with any PC or Mac computer with a USB-A port or adapter without the need to install software. Minimizes unwanted background noise for clear conversations. Right-sided mic can be conveniently positioned for better voice capture. Discreet boom can be tucked inside the headband and out of the way when you're not using it. Adjust the volume or mute your calls with simple on-ear controls located on the right ear cup. Confirm mute status with an easy-to-see light indicator on the headset cord. USB provides easy plug-and-play operation. Simply plug the USB-A connector into your computer and instantly enjoy conversations, movies, or music in rich stereo sound.

### Matias Half Keyboard

40830 AT

PIJS

2002 Matias Corporation

This very compact assistive technology enables people who have lost the use of one hand to touch-type quickly using their existing touch-typing skills. This USB keyboard is the left half only and allows you to touch-type with just your left hand (your left hand can produce all the letters normally typed by the right hand using the half keyboard technology). This keyboard has been chosen by occupational therapists, insurance companies, workplace insurance boards, schools, governments and businesses for over 20 years for one-handedness, hemiplegia, blindness (reading a braille screen with one hand while typing with the other hand), as well as other conditions where typing with only one left hand is required. (Note: if you only can type with your right hand, please order the Matias Half-QWERTY Keyboard

### ✧ Orbitrack Assistive Technology Device

41023 AT

PIJS

2022 Pretorian Technologies Ltd.

The Orbitrack is a revolutionary, new, input device, which allows computer users to control both the direction and speed of the cursor with a single, soft touch. Requiring no hand or wrist movement, Orbitrack represents a significant advance in computer input technology and is suitable for computer users with motor skill difficulties and movement impairment. Unlike a mouse, trackball or joystick, no hand or wrist movement is necessary and unlike a touch pad, the cursor does not have to be 'driven' around the screen by constant finger
